ARTICLES

M. Srinivasan, D.J. Petersen, and F.B. Holl	Nodulation of <i>Phaseolus vulgaris</i> by <i>Rhizobium etli</i> is enhanced by the presence of <i>Bacillus</i>	1
I. Kühn, G. Huys, R. Coopman, K. Kersters, and P. Janssen	A 4-year study of the diversity and persistence of coliforms and <i>Aeromonas</i> in the water of a Swedish drinking water well	9
Per Bruheim, Harald Bredholt, and Kjell Eimhjellen	Bacterial degradation of emulsified crude oil and the effect of various surfactants	17
Lloyd B. Jeffs and George G. Khachatourians	Estimation of spore hydrophobicity for members of the genera <i>Beauveria</i> , <i>Metarhizium</i> , and <i>Tolypocladium</i> by salt-mediated aggregation and sedimentation	23
Nancy A. Buchmeier and Stephen J. Libby	Dynamics of growth and death within a <i>Salmonella typhimurium</i> population during infection of macrophages	29
Philip F. Ganter and Bryan Quarles	Analysis of population structure of cactophilic yeast from the genus <i>Pichia</i> : <i>P. cactophila</i> and <i>P. norvegensis</i>	35
Bryan A. Bailey, James C. Jennings, and James D. Anderson	The 24-kDa protein from <i>Fusarium oxysporum</i> f.sp. <i>erythroxyliae</i> : occurrence in related fungi and the effect of growth medium on its production	45
R.C.G. Simão, C.G.M. Souza, and R.M. Peralta	The use of methyl β -D-xyloside as a substrate for xylanase production by <i>Aspergillus tamarii</i>	56
G. Djordjevic, B. Bojovic, N. Miladinov, and L. Topisirovic	Cloning and molecular analysis of promoter-like sequences isolated from the chromosomal DNA of <i>Lactobacillus acidophilus</i> ATCC 4356	61
Tracey M. Swan and Kenneth Watson	Membrane fatty acid composition and membrane fluidity as parameters of stress tolerance in yeast	70
Eric Paget and Pascal Simonet	Development of engineered genomic DNA to monitor the natural transformation of <i>Pseudomonas stutzeri</i> in soil-like microcosms	78
C.S. Rao, G.D. Sharma, and A.K. Shukla	Distribution of ectomycorrhizal fungi in pure stands of different age groups of <i>Pinus kesiya</i>	85
A. Ramezani, W. Marhin, M. Weerasinghe, and S. Joshi	A rapid and efficient system for screening HIV-1 Pol mRNA-specific ribozymes	92

NOTE

David B. Carson, Michael A. Heitkamp, and Laurence E. Hallas	Biodegradation of <i>N</i> -phosphonomethylimidodiacetic acid by microorganisms from industrial activated sludge	97
---	--	----

REVIEW / SYNTHÈSE

Yoav Bashan and Gina Holguin	<i>Azospirillum</i> —plant relationships: environmental and physiological advances (1990–1996)	103
-------------------------------------	--	-----

ARTICLES

David J. Frost, Melinda Knapp, Kim Brandt, Amber Shadron, and Robert C. Goldman	Characterization of a lipopeptide-resistant strain of <i>Candida albicans</i>	122
--	---	-----

Jeremy Jorgensen, Sona Dolan, Aaron Haselton, and Rita Kolchinsky	Isolation and cultivation of spore-forming filamentous bacteria from <i>Porcellio scaber</i>	129
Martina Celerin, Alan W. Day, Ronald J. Smith, and David E. Laudenbach	Immunolocalization of fimbrial epitopes in thin sections of <i>Microbotryum violaceum</i>	136
Yousheng Ma, Timothy M. Curran, and Robert E. Marquis	Rapid procedure for acid adaptation of oral lactic-acid bacteria and further characterization of the response	143
Jin W. Lee, Walter G. Yeomans, Alfred L. Allen, David L. Kaplan, Frank Deng, and Richard A. Gross	Exopolymers from curdlan production: incorporation of glucose-related sugars by <i>Agrobacterium</i> sp. strain ATCC 31749	149
Tetsuji Yasui, Tomoyuki Okamoto, and Hiroshi Taguchi	A specific oligonucleotide primer for the rapid detection of <i>Lactobacillus lindneri</i> by polymerase chain reaction	157
S. Sivakumaran, P.J. Lockhart, and B.D.W. Jarvis	Identification of soil bacteria expressing a symbiotic plasmid from <i>Rhizobium leguminosarum</i> bv. <i>trofolii</i>	164
J.R. Lawrence, Y.T.J. Kwong, and G.D.W. Swerhone	Colonization and weathering of natural sulfide mineral assemblages by <i>Thiobacillus ferrooxidans</i>	178

NOTES

Jan Novák, Jan Kopecký, and Zdenko Vaněk	Nitrogen source regulates expression of alanine dehydrogenase isoenzymes in <i>Streptomyces avermitilis</i> in a chemically defined medium	189
Shawn D. Mansfield, Thomas J. Marrie, and Greg. S. Bezanson	Characterization and cloning of a 37.6-kb plasmid carried by <i>Legionella pneumophila</i> recovered from patients and hospital water over a 12-year period	193
Christian G. Gliesche	Transformation of methylotrophic bacteria by electroporation	197
Lulu Farhana and Peter B. New	The 2,4-dichlorophenol hydroxylase of <i>Alcaligenes eutrophus</i> JMP134 is a homotetramer	202
Sung-Keun Rhee, Ki-Young Lee, Jae-Chun Chung, and Sung-Taik Lee	Degradation of pyridine by <i>Nocardoides</i> sp. strain OS4 isolated from the oxic zone of a spent shale column	205

March / Mars

ARTICLES

F.G. Ferris and E.A. Lowson	Ultrastructure and geochemistry of endolithic microorganisms in limestone of the Niagara Escarpment	211
Mark A. Farinha and Andrew M. Kropinski	Overexpression, purification, and analysis of the <i>cI</i> repressor protein of <i>Pseudomonas aeruginosa</i> bacteriophage D3	220
Katherine F. Dobinson, Nicolas Lecomte, and George Lazarovits	Production of an extracellular trypsin-like protease by the fungal plant pathogen <i>Verticillium dahliae</i>	227
Francis F. Arhin, France Moreau, James W. Coulton, and Elaine L. Mills	Subtyping of <i>Neisseria meningitidis</i> strains isolated in Quebec, Canada: correlation between deduced amino acid sequences and serosubtyping techniques	234
Jingwen Yin and Henry R. Henney, Jr.	Stable transfection of <i>Acanthamoeba</i>	239
M.A. Guevara, M.T. González-Jaén, and P. Estévez	Multiple forms of pectic lyases and polygalacturonase from <i>Fusarium oxysporum</i> f.sp. <i>radicis lycopersici</i> : regulation of their synthesis by galacturonic acid	245
A. Quadt-Hallmann, J. Hallmann, and J.W. Kloepper	Bacterial endophytes in cotton: location and interaction with other plant-associated bacteria	254
Patricia Roeckel-Drevet, Véronique Coelho, Jeanne Tourvieille, Paul Nicolas, and Denis Tourvieille de Labrouhe	Lack of genetic variability in French identified races of <i>Plasmopara halstedii</i> , the cause of downy mildew in sunflower <i>Helianthus annus</i>	260
J.R. Degorce-Dumas, S. Kowal, and P. Le Cloirec	Microbiological oxidation of hydrogen sulphide in a biofilter	264
D.K. Jain, S. Stroes-Gascoyne, M. Providenti, C. Tanner, and I. Cord	Characterization of microbial communities in deep groundwater from granitic rock	272
Kevin W. Millsap, Gregor Reid, Henry C. van der Mei, and Henk J. Busscher	Cluster analysis of genotypically characterized <i>Lactobacillus</i> species based on physicochemical cell surface properties and their relationship with adhesion to hexadecane	284

NOTES

Salim K. Mujawar and Jaiprakash G. Shewale	Production of D-amino acid oxidase by <i>Aspergillus</i> sp. strain O20 active on cephalosporin C	292
Takuichi Tsubata, Toshiyuki Tezuka, and Ryuichiro Kurane	Change of cell membrane hydrophobicity in a bacterium tolerant to toxic alcohols	295
Song Jin, Norbert G. Swoboda-Colberg, and Patricia J.S. Colberg	Microbial degradation of quadricyclane-derived tricyclo-[2.2.1.0 ^{2,6}]heptan-3-ol in soil	300

April / Avril

ARTICLES

P. Marsot Activités métaboliques et toxicité du dinoflagellé <i>Alexandrium tamarense</i> en culture à dialyse exposée à un milieu estuarien	305
Bret Steiner, Sandra Romero-Steiner, Donna Cruce, and Robert George Cloning and sequencing of the hyaluronate lyase gene from <i>Propionibacterium acnes</i>	315
Alexandre de Siqueira Pinto, Cristine Chaves Barreto, Augusto Schrank, Cirano José Ulhoa, and Marilene Henning Vainstein Purification and characterization of an extracellular chitinase from the entomopathogen <i>Metarhizium anisopliae</i>	322
Jacqueline Abranches, Paula B. Morais, Carlos A. Rosa, Leda C. Mendonça-Hagler, and Allen N. Hagler The incidence of killer activity and extracellular proteases in tropical yeast communities	328
Josette Chaufaux, Michel Marchal, Nathalie Gilois, Isabelle Jehanno et Christophe Buisson Recherche de souches naturelles du <i>Bacillus thuringiensis</i> dans différents biotopes, à travers le monde	337
W.F. Mahaffee and J.W. Kloepper Bacterial communities of the rhizosphere and endorhiza associated with field-grown cucumber plants inoculated with a plant growth-promoting rhizobacterium or its genetically modified derivative	344
V.K. Pillay and J. Nowak Inoculum density, temperature, and genotype effects on in vitro growth promotion and epiphytic and endophytic colonization of tomato (<i>Lycopersicon esculentum</i> L.) seedlings inoculated with a pseudomonad bacterium	354
M.J.R. Nout, C.E. Platis, and D.T. Wicklow Biodiversity of yeasts from Illinois maize	362
Fadi Dagher, Eric Déziel, Patricia Lurette, Gilles Paquette, Jean-Guy Bisailly, and Richard Villemur Comparative study of five polycyclic aromatic hydrocarbon degrading bacterial strains isolated from contaminated soils	368
Chantal Laugero, Christian Mougin, Jean-Claude Sigoillot, Serge Moukha, and Marcel Asther Comparison of static and agitated immobilized cultures of <i>Phanerochaete chrysosporium</i> for the degradation of pentachlorophenol and its metabolite pentachloroanisole	378
Alexander Gorkovenko, Jinwen Zhang, Richard A. Gross, Alfred L. Allen, and David L. Kaplan Bioengineering of emulsifier structure: emulsan analogs	384

NOTES

G. Burd and O.P. Ward Energy-dependent accumulation of particulate biosurfactant by <i>Pseudomonas marginalis</i>	391
Laura Marri, Emanuela Barboni, Tiziana Irdani, Brunella Perito, and Giorgio Mastromei Restriction enzyme and DNA hybridization analysis of cellulolytic <i>Streptomyces</i> isolates of different origin	395
Sylvie-Isabelle Mazurier and Gisele Laguerre Unusual localization of <i>nod</i> and <i>nif</i> genes in <i>Rhizobium leguminosarum</i> bv. <i>viciae</i>	399

Martine Aubert, Elisabeth Weber, Brigitte Gintz, Keith F. Chater, and Bernard Decaris Inactivation or amplification of the <i>spa2</i> gene, encoding a potential stationary-phase regulator, affects differentiation in <i>Streptomyces ambofaciens</i>	1118
Ilkka T. Miettinen, Terttu Vartiainen, and Pertti J. Martikainen Changes in water microbial quality during bank filtration of lake water	1126
Simcha Stroes-Gascoyne, Karsten Pedersen, Shelly A. Haveman, Karin Dekeyser, Johanna Arlinger, Sylvie Daumas, Susanne Ekendahl, Lotta Hallbeck, Connie J. Hamon, Nadi Jahromi, and Terri-Lynn Delaney Occurrence and identification of micro-organisms in compacted clay-based buffer material designed for use in a nuclear fuel waste disposal vault	1133
Shih-Tong Jeng, Sheue-Hwey Lay, and Hsi-Mei Lai Transcription termination by bacteriophage T3 and SP6 RNA polymerases at Rho-independent terminators	1147
Holly S. Schrader, John O. Schrader, Jeremy J. Walker, Thomas A. Wolf, Kenneth W. Nickerson, and Tyler A. Kokjohn Bacteriophage infection and multiplication occur in <i>Pseudomonas aeruginosa</i> starved for 5 years	1157
José M. Costa and Joyce E. Loper Ecbl and EcbR: homologs of LuxI and LuxR affecting antibiotic and exoenzyme production by <i>Erwinia carotovora</i> subsp. <i>betavasculorum</i>	1164
K.A. Billingsley, S.M. Backus, C. Juneson, and O.P. Ward Comparison of the degradation patterns of polychlorinated biphenyl congeners in Aroclors by <i>Pseudomonas</i> strain LB400 after growth on various carbon sources	1172
K.M. Oulé, G. Turcotte et Y. Beaulieu Croissance et activité cellulaire du <i>Brevibacterium casei</i> NCDO 2049 dans du perméat de lactosérum	1180
Carmen Moreno, Isabel de Blas Francisca Miralles, David Apraiz, and Vicente Catalan A simple method for the eradication of <i>Legionella pneumophila</i> from potable water systems	1189
NOTES	
Agnes Kiesling Casali and Júnia Soares Hamdan Effects of three azole derivatives on the lipids of different strains of <i>Sporothrix schenckii</i>	1197
Gab-Gyun Shin, Sadatoshi Meguro, and Shinsaku Kawachi The active constituent in yeast extract for fruit body formation of <i>Lentinula edodes</i>	1202
